

↘

E 10.1

Amplifier

Features:

- ↘

DSP inside, with FIR phase correction function

Technical Specifications

|                    |                          |            |                                       |
|--------------------|--------------------------|------------|---------------------------------------|
| In/Outputs         | Output Power (8Ω)        |            | 10×30W + 1×500W                       |
|                    | Input Connectors         |            | XLR Female                            |
|                    | Output Connectors        |            | 10×wiring clips + 1×Speakon Connector |
|                    | Sensitivity              |            | 1.2V                                  |
|                    | Power Supply             |            | 220V ~ 50-60Hz                        |
| Nominal Parameters | Input Impedance          | Balanced   | 20KΩ                                  |
|                    |                          | Unbalanced | 10KΩ                                  |
|                    | Frequency Response       |            | 20Hz-20kHz±0.5dB                      |
|                    | THD                      |            | <0.05%                                |
|                    | S/N Ratio (dB)           |            | 100 dB                                |
|                    | Conversion Rate          |            | 40v/μs                                |
| Protect            | Damping Factor           |            | >500                                  |
|                    | DC Protect               |            | 0.7-1V                                |
|                    | Short-circuit Protect    |            | Yes                                   |
|                    | Over-temperature Protect |            | Yes                                   |
| Dimension & Weight | Dimension (WxHxD)        |            | 426×90×440mm                          |
|                    | Net Weight               |            | 25kg                                  |
